SUMMARY

Aspiring MERN Stack Developer with a strong foundation in HTML, CSS, JavaScript, and React, and currently expanding skills in Node.js and MongoDB. Passionate about building responsive web applications and continuously learning modern full-stack development practices.

EXPERIENCE

Fresher

Entry-level Frontend Developer with hands-on experience in HTML, CSS, JavaScript, and React. Skilled in building responsive and user-friendly web interfaces, with a strong focus on clean design and performance. Continuously learning modern web development practices and expanding knowledge of backend technologies like Node.js and MongoDB.

PROJECTS

AI-POWERED RESUME BUILDER

Web Application

Developed an AI-powered ATS-friendly resume builder using React, Node.js, and MongoDB. Built responsive and dynamic user interfaces with React, while implementing backend services with Node.js for data processing and storage. Enabled users to generate structured, optimized resumes suitable for Applicant Tracking Systems.

Hangman Game

Web Application

Developed a Hangman game using HTML, CSS, and JavaScript, implementing interactive gameplay and dynamic word guessing functionality. Designed a responsive user interface and handled game logic using JavaScript, including user input validation, score tracking, and win/loss conditions.

EDUCATION

Bachelor's of Technology in Computer Engineering

Madhuben & Bhanubhai Patel Institute of Technology
• GPA: 8.89
